Is a Blue Whale the Biggest Thing There Is?

Summary: This very cool book teaches us about the big, bigger, and biggest things we know of! We get to see pictures of the biggest animal, compared to the biggest mountain, compared to planet Earth! Do you know what the biggest star is? Or how many of our suns fit inside the biggest star? Did you know that the universe is made up of many different galaxies and one galaxy is bigger than the biggest star? This book teaches us so many cool measurements. 这是一本非常酷的书，让我们知道大，更大和最大的物。用大幅照片里的动物和大山相比，再与地球相比。你知道最大的星星是什么吗？多少个太阳的体积相当于一个最大的星星？您是否知道宇宙由许多不同的星系组成，并且一个星系比最大的星星还要大？这本书教了我们很多很酷的测量方法。

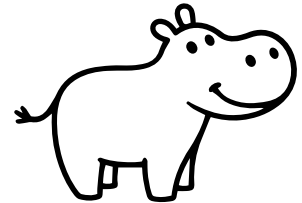

1. What is the biggest animal on earth? Colour the correct answer!

Blue Whale

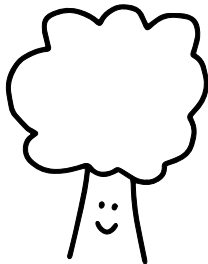

Elephant

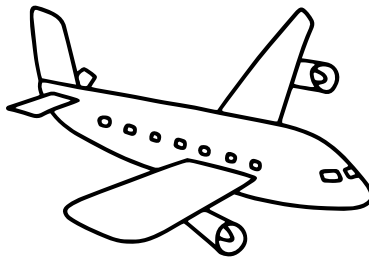

Hippopotamus

2. What do one hundred Mt. Everests look like on the face of the Earth? Colour the correct answer!

Tree

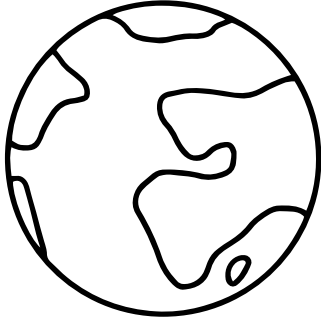

Airplane

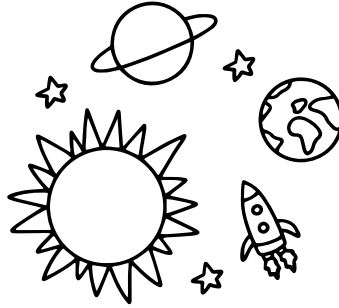

Whisker

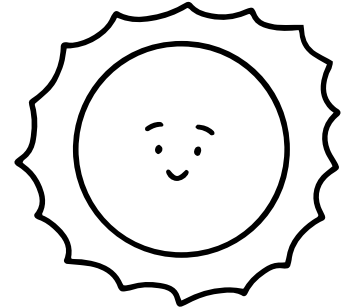

3. What is the biggest thing we know of? Colour the correct answer!

Earth

Universe

Sun

Lesson: This book puts the biggest things we know of into perspective by comparing them to each other! We learn how BIG things really are! 这本书通过相互比较，让我们对实体的大小有所了解，对“最大”有个概念了解！

Draw something from the story!
